Drug Prescribing In Renal Failure: Dosing Guidelines For Adults, Fifth Edition

Synopsis

Here is the classic pocket guide to drug-dosing for patients with impaired renal function in a revised and updated New Edition! Easy-to-read tables put the information physicians need when determining dosages for more than 450 drugs at their fingertips. Plus, this New Edition features brand-new guidance on pediatric dosing, making it the most complete resource of its kind.

Customer Reviews

Several features in Edition 5 are welcomed, these were on my wish list.1. Expanded information about metabolism and excretion. Numerous entries do include limited details on P450 enzyme systems and the bibliography at the end gives references which could provide more specific data.2. Percent plasma binding & volume of distribution are still given, these do help with predicting dialyzability of meds or anticipating difficulties in patients with large BSAs.3. More supplementation guidelines are provided for intermittent hemodialysis, CRRT and PD when known.4. There is, in fact, a mobile version for Palm, Blackberry, PocketPC, Tablet PC, Laptops and Desktops available through [...] and called RFDugs which I have not yet explored.5. Also I appreciate the consistent and concise categorization of CrCl (>50, 10-50 and
