Surviving Toxic Black Mold Syndrome describes how a Physician became disabled by exposure to toxic indoor molds, including *Stachybotrys*, how she discovered and identified the problem and more importantly, the treatments she used to recover. Since Mary Beth Short-Ray is an Osteopathic Physician, the book contains more accurate descriptions of her symptoms, than most books written by laymen. In addition to using testing and treatment protocols developed by Ritchie Shoemaker, MD, the author discusses herbals and nutrients which she incorporated into her treatment. She also includes the best discussion of infrared saunas, which I have found. If you only want to read one

easily readable toxic mold book or want a briefer one to give to a busy Physician, this is the one I would recommend.

Although I have found other books to be more informative - some have been tiringly long, however - this one covers basic information about the hazards of and how to survive toxic black mold. I have found it to be a good paperback to loan to friends and family members whom I did not believe would read a "War and Peace" edition on the subject, and most have handed it back saying that they learned a lot from it.

This is a must read book for someone who has been or believes that they have been exposed to toxic black mold. This doctor, herself suffers from the effect of Toxic black mold. This book is a good help. Please pay attention to her reference to Dr. Shoemaker and seek out his resources as well, such as "Mold Warriors".
