# Quantum Jumps: An Extraordinary Science Of Happiness And Prosperity

## **Synopsis**

Quantum Jumps presents a radical new paradigm - that we exist in an interconnected holographic multiverse in which we literally jump from one parallel universe to another. Experience a new science of instant transformation. In a moment you can become smarter...more confident...happier...more outgoing...more effective...in better relationships...with more willpower. Gain practical tools to achieve real change in your life, regardless of past history. Leap forward to become happier and more successful, living the life of your dreams. Supported by distinguished sources from the fields of psychology, biology, sociology, and physics, Quantum Jumps is an inspirational audiobook packed with practical tools for living a happier, healthier, more prosperous life.

## **Book Information**

Audible Audio Edition

Listening Length: 7 hours and 38 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Cynthia Sue Larson

Audible.com Release Date: September 12, 2014

Whispersync for Voice: Ready

Language: English

ASIN: B00NIZ4XH0

Best Sellers Rank: #64 in Books > Medical Books > Psychology > Experimental Psychology #78 in Books > Health, Fitness & Dieting > Psychology & Counseling > Experimental Psychology #1004 in Books > Audible Audiobooks > Health, Mind & Body > Psychology

## **Customer Reviews**

The author asked me to review this book, and I agreed because it comes at a good time in my 61-year long life. I have read it along with Peter Levine's *In an Unspoken Voice: How the Body Releases Trauma and Restores Goodness* and *The Druid of Harley Street: The Spiritual Psychology of E. Graham Howe*. Waiting to be read in this series is *The Seven Mysteries of Life: An Exploration of Science and Philosophy*. Among them all this is the 6 star special (my top 10% across 1,900+ non-fiction reviews), the easiest to grasp, the most meaningful for those seeking to make the leap from being trapped in a world controlled by a malevolent 1%, to a world in which we have a greater effect on ourselves and our community. My past reading lists, all leading to , in this general

area are easily found by searching for Worth a Look: Book Reviews on Conscious, Evolutionary, Integral Activism & Goodness Worth a Look: Book Reviews on Evolutionary Dynamics What most impressed me about this book was its deep appreciation of real-world physics -- it was not until the end of the book that I realized that the author was trained in this discipline and has a very healthy bibliography in that discipline included in the book. This is NOT a "kum-ba-ya" book.

I wear a mask to bed because the darkness helps me sleep. That's not entirely true. I have always been afraid of the dark because as long as I can remember I have seen people in my bedroom that aren't real. Not every night; just enough to scare the living hell out of me. It started when I was a child, continued through my adulthood, and I later learned (through my Mum) that a man and his dog would watch me from the end of my bed when I was a toddler. I have many strange tales to tell, but the strangest one of all happened when I was aged 8 or 9 during a sleepover at my Grandmothers. I was sleeping in my Uncle Ian's bedroom and I remember being scared because posters of Kiss and David Bowie adorned his walls. It seems stupid now but back then a fully painted Gene Simmons, and Ziggy Stardust, was no different than a crazed clown. One night I woke up, looked to the left hand side of my bed, and there sitting on a chair next to me was my uncle Ian; quite remarkable considering he wasn't even at home that night. I closed my eyes, hid underneath the blankets and stayed there until I fell asleep. When you see a dead person, or an apparition of a stranger, you can explain it through the medium of ghosts. My Uncle Ian is still alive, and well, to this day. It has always perplexed me until now. Cynthia Sue Larson is the author of Quantum Jumps: An Extraordinary Science of Happiness and Prosperity. If she were to read this then she would not be perplexed. Instead, she would say there is a perfectly rational explanation: "I made a quantum jump. A quantum jump is a leap from one state of being to another, and she has gotten me asking the same question time and time again.
